

Lista Mobility Deployment Solutions

Lista Cabinets Bring New Storage Efficiency to Air, Land and Sea

As a world leader in the design and manufacture of modular storage and workspace systems, Lista's innovative storage solutions enable Department of Defense facilities and rapid deployment containers to maximize storage space, improve organization and increase productivity. Modular storage cabinets are the perfect storage solution for military ISO containers, ISU containers, tactical shelters, trucks, trailers and other mobility applications.

Lista cabinets have 50% more storage capacity than conventional shelving and feature much more usable storage space than any other competitive cabinet. Lista's customizable cabinets can reduce the number of air, land and sea containers, freeing up cargo space on aircraft, ships and trucks. Lista cabinet drawers can store a wide variety of components, including Class IX, ASL, PLL and even weapons.

Lista's full-height drawer sidewalls allow the use of the full cubic capacity of the drawer.

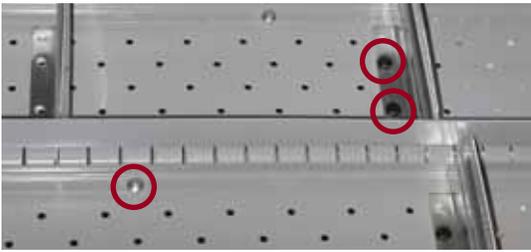

Lista cabinets and mobile cabinets maximize security with options like our heavy-duty hinged lock bars with padlock (above left), hasp door and safety lock (above center) and our lock-in-lock-out safety device (below right) with its open and close release lever in front for easy access.

Lista's galvanized steel shelf battens (above) can be used to stabilize cabinet contents, keeping bulk materials in place during deployment or when moving over rough terrain. The shelf with lip option (right) similarly keeps cabinet contents from sliding off of shelves.

Lista's extremely durable fork truck base has an open-slotted foot in both the front and back position for easy bolt installation and removal.

Lista drawer partitions and dividers feature screws and fasteners which fix them in place to the bottom of the drawer, so parts and other stored items don't migrate under the dividers. This feature sets Lista apart, making us uniquely able to store and secure your items, no matter how small. They fit into their individual sub-compartments, with no worries about getting items mixed and mingled, especially when being transported.

Lista drawer handles are flush with the cabinet housing when closed. This means that nothing protrudes from the cabinet face, not only improving safety and appearance, but eliminating snagging of clothing, uniforms and skin.

Lista's hinged drawer handle covers provide complete protection for drawer labels against daily handling, tears, spills, grease and grime. These innovative, clear hinged handle covers resist yellowing while clearly displaying label information. Supplied with all Lista cabinets, Storage Wall® systems and other products with drawers, the hinged handle covers even protect bar codes without impeding their easy reading by bar code scanners.

Hinged handle covers are perfectly complemented by free downloadable Lista Script labeling software, making Lista's drawer labeling system even more functional and powerful. This easy-to-use software lets users produce informational and attractive labels, making drawer contents easy to identify, locate and inventory, enhancing organization and efficiency.

Lista Free Design Services

ListaWorks™ is how we make workspace work for you. It's our process for providing the highest-quality, custom-configurable solution that precisely fits your unique space and usage requirements, from on-site survey to detailed plans. Then we build it with famous Lista quality and durability. That's making workspace work for you.
